User List	
User Name	**Description**
Coach	The user that creates a team, has access to add players to the team's roster, add other users as coaches, create events for a team, and send out email reminders through the system. The coach is also the one who receives the attendance summary a day before an event. The coach also has all access as a parent to their players.
Parent	The user who owns a player on a team. This user can create and edit players. This user can also create and edit a carpool for an event, as well as add and remove riders on that carpool. For attendance, this user can respond for their player's attendance for an event. This user receives an email prompting them to RSVP 2 days before an event if they haven't responded, or if the coach sends a reminder.

A-Level User Stories
User Story
As a Coach, I want to be able to create future events for a team so players could mark their attendance for the event
As a Coach, I want to be able to check the attendance of everyone who is coming to an event so that I will know if I can field a team
As a Parent, I want to be able to confirm the attendance status of my child so the coach will know if my child is coming
As a Coach, I want to be able to create teams so I can add players on to teams
As a Coach, I want to be able to add players on to teams so they could report their attendance for team events

B-Level User Stories
User Story
As a Parent, I want to be able to request for a carpool for my child so that my child can make it to the event
As a Parent, I want to be able to create a carpool to take on players that need a ride so they can get to the event
As a Parent, I want to be able to confirm the attendance status of my child through email so that I don't have to navigate to the application directly
As a Parent, I want to see a map of the event with directions on how to get there so that I know where to go
As a Coach, I want to be able to automatically create parent accounts for my teams who are not registered in the system so the parents don't have to do it manually, and they will receive updates by email without ever signing up themselves
As a Coach, I want to be able to send out reminders for events so that parents remember to confirm their child's attendance
